

BLUE MAN GROUP NATIONAL TOUR – BY THE NUMBERS

The tour has logged 150,000 miles since launching in 2010. That is the equivalent of circling the globe 6 times!

The Blue Man Group national tour travels in 6 tractor trailers.

The physical equipment used during the show weighs over 60 gross tons.

Approximately 12 crew members run the show. This includes wardrobe, props, video, sound, electrics, deck and stage management.

The tour creates 75 loads of laundry every week.

During a week of performances, the tour uses the following:

- 25 drum heads, including both the band loft and stage.
- 14 cymbals are used with the drum kit.
- 24 drumsticks.
- 550 feet of piping are used to make the PVC tubed instruments.
- 50 gallons of paint.
- 32 pounds of Jell-O.
- 8 boxes of Cap'n Crunch cereal.
- 96 pieces of white chocolate Toblerone.
- 240 marshmallows.
- 800 mashed up bananas.
- 40 boxes of Twinkie Lights (each Twinkie has just 130 calories!).
- 9 cakes of blue makeup specially made for Blue Man Group (we even have our own proprietary color Blue Man Blue).
- 27 bald caps.
